

Method for assembling upholsteries for a seat or for stuffed furniture and related upholstery

«Method for assembling upholsteries for a seat or for stuffed furniture and related upholstery» is a registered trademark of Sistemazienda Srl. This document is available at www.sistemazienda.com in tab «De renovatio». For informations write to gbtrentadue@sistemazienda.com

MAIN FEATURES

Innovation and simplification of production process

Important decrease of upholstery raw material

*Sewing testing with method
prove upholstery raw material
decrease ~ 10% - 15%*

METHOD PROs

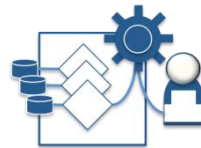

Upholstery **design** and
comfort improvement

Lower **environmental**
impact

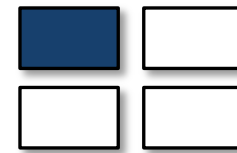

More **efficient production**
process

Other PROs

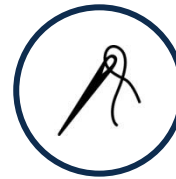

METHOD PROs – Design and comfort

Flatness along the junction seaming line (without joining cords)

Reduction of the size of needle holes and of their visibility

Absence of “seam cords” or “joining cords” of the seaming

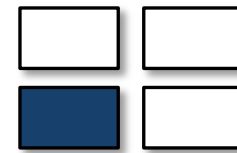

Seat more pleasant to touch

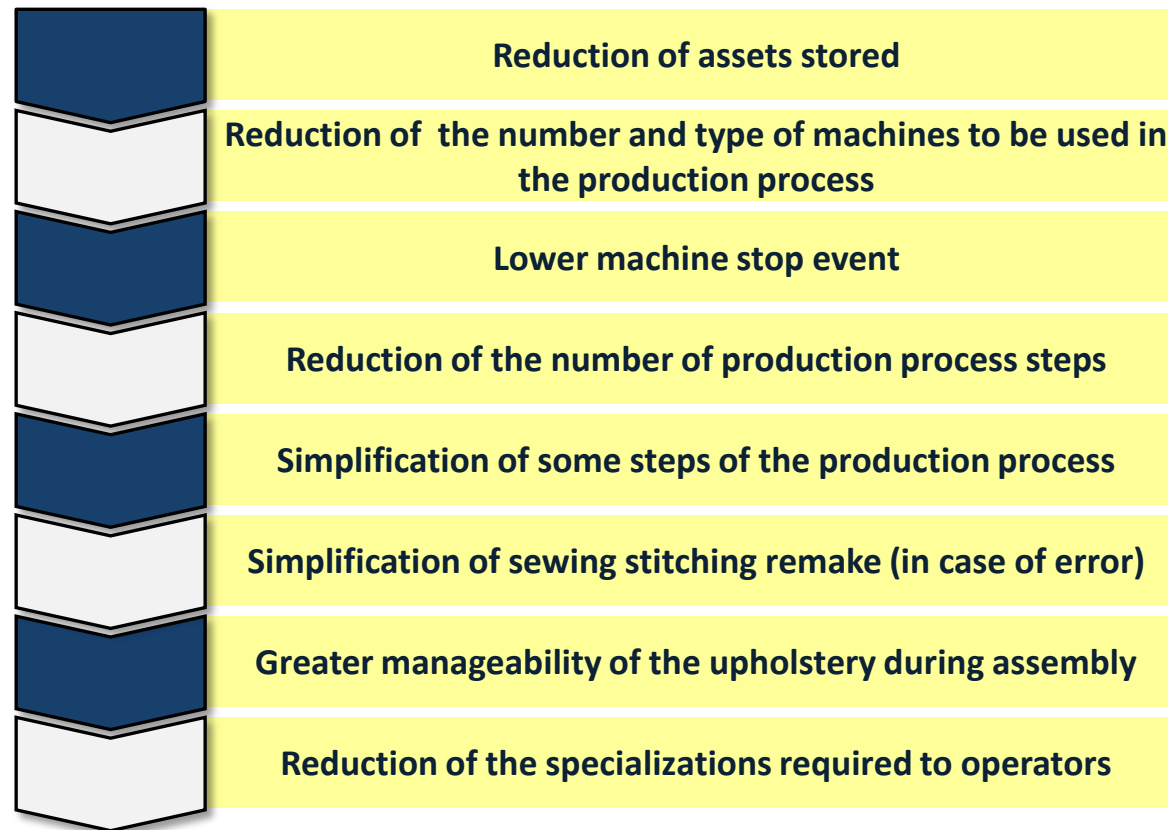

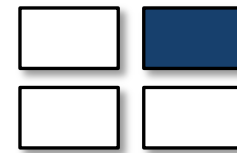

No visibility of the crochet thread

METHOD PROs – Production Process

METHOD PROs – Environmental Impact

Reduction of processing waste

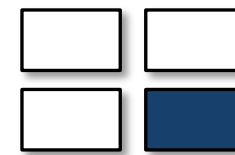

Easier cleaning for absence of “seam cords” or “joining cords” of the seaming

Reduction of chemical products to be used in upholstery production process (leather tanning, fabrics coloring, etc.)

METHOD PROs – Other PROs

- ❖ Increase of **company efficiency**
- ❖ **Cost reduction** (staff, materials, timing)
- ❖ Increase of **automation potential**
- ❖ **Mark – up** rising
- ❖ Increase of **diversification**
- ❖ Increase of **potential selling**
- ❖ «**Premium segment**» commitment

- ❖ Products **characterization**
- ❖ Absence of “**seam cords**”
- ❖ Reduction of the **yarn types**
- ❖ Reduction of **yarn breaking**
- ❖ Reduction of **needle breaking**
- ❖ Reduction of **product weight**
- ❖ Removal of **yarn cutting in seaming intersection**

FURTHER METHOD ESY APPLICATIONS

Simplicity of application combined with above **PROs** allow method application **not just in «home»...**
